WATCH GUARANTEE

INTRODUCTION TO YOUR WATCH
We would like to pass on to you some information, which we hope you will find interesting and helpful. Your watch has been produced to a high quality standard and with careful use will give you many years of satisfactory service. You can greatly assist in improving the life of your watch by following a few simple suggestions:

HANDLE WITH CARE
Although your watch is shock resistant, please do not take unnecessary risks by wearing the watch whilst carrying out rough work, etc.

PLATING
Gold, Silver and Rhodium plated cases can be damaged by hair or body sprays. Please therefore, whenever possible, place on your wrist after using such sprays – not before.

BATTERIES
The battery life should be approximately 18 months. Battery changes require special tools and expertise – particularly in water resistant watches which may have an inner seal and which could be broken whilst opening the case back. Your

OPERATING INSTRUCTIONS

QUARTZ NON-DATE WATCH

- Pull crown out to position B
- Advance hands clockwise to the correct time
- Return to position A

QUARTZ DATE WATCH

- Time setting as above, but pull crown out to position C
- Date setting by pulling crown out to position B and turning clockwise or anti-clockwise
- Return to position A

QUARTZ DAY/DATE WATCH

- Time setting as above, but pull crown out to position C
- Date setting by pulling crown out to position B and turn clockwise, return to position A
- Day setting by pulling crown to position B and turn anti-clockwise. Return to position A.

Do not wind the crown when it is in position A. If your

battery replacement should therefore be done by a qualified person. Please do not attempt to do this yourself as you may cause damage and therefore invalidate the guarantee.

watch has a second (sweep) hand you will notice that on pulling the crown out to position C, the second hand stops - this is normal.
