- Reduces the alkalinity
- Safe for use in all hot tubs and pools

Information

Use WAVE pH Reducer to lower the pH of swimming pool water and to reduce the alkalinity. The pH should be correctly maintained to ensure bather comfort and the protection of the pool and its equipment. Use a good quality testing kit, such as the Wave Testing Strips, to determine the pH and/or Total Alkalinity Levels. To reduce pH, add 10g of the pH solution to 1000L water (the max capacity of our [Read More](#)
